Final Note by the Extra Member of Council.

Subject:—

Amendment of rule 27 of the rules for the grant of exploring and prospecting licenses and mining leases.

Rule 27 of the rules for the grant of exploring and prospecting licenses and mining leases, relating to applications for renewals, requires, that all applications for renewals of prospecting licenses should be submitted to the Director not less than seven days before the date on which the licenses terminate. It has been found in practice that the period of seven days, thus laid down, is, in almost every case, insufficient for the Director's obtaining and communicating the orders of Government to the applicants concerned, with the result, that for some short period between the expiry of the license and the communication of the decision of Government, applicants in most cases carry on work in anticipation of sanction. This is both irregular and objectionable. The period of seven days was fixed at a time when the State Geologist was Secretary to Government in the Geological Department as well. It perhaps fully served its purpose then. But, as the Director of Mining and Geology is no longer Secretary to Government in the department, the period is much too short for anything being done. The Director of Geology has, in his letter No. 193 dated 17th July 1918, therefore, proposed that the rule may be amended so as to require such applications to be submitted in future not less than one month before the expiry of the licenses.

Paper under disposal

The proposal was considered in Council and they are of opinion that, with a view to allow sufficient time to the Director for obtaining and communicating orders in each case, applications for renewals of licenses shall, in future, be submitted to the Director, Department of Geology, not less than two months before

Z 4. Rule 27 of the present rules requires the submission of applications for renewals of prospecting licenses not less than seven days before the date on which the licenses terminate. The period of seven days is apparently too short for the orders of Govt to be communicated to the licensees before the expiry of the original term of the licenses. The consequence of this has been that the licensees have continued work beyond the original term of the licenses in anticipation of the renewal of the licenses. This is an irregularity which need no longer be permitted to continue and which can be easily remedied. The remedy would, I think, be well provided for if applications for renewals are required to be submitted in future not less than one month before the date on which the licenses terminate and if arrangements are made for the orders of Govt to be communicated to the applicants so as to reach them before that date. This is a point which I incidentally beg to submit for the consideration of Govt.

GENERAL AND REVENUE DEPARTMENTS.

Read—

Paragraph 4 of letter No. 193, dated 17th July 1918, from the Officiating Director, Department of Geology, submitting for orders of Government that Rule 27 of the Rules for the grant of exploring and prospecting licenses and mining leases which requires the submission of applications for renewals of prospecting licenses not less than seven days before the date on which the licenses terminate, may be amended so as to require such applications to be submitted in future not less than one month before the expiry of the licenses.

Order No. G. 8913-14—Geol. 32-18-1, dated 16th November 1918.

The Director reports that the period of seven days is too short for obtaining the orders of Government and communicating the same to the applicants and that in many cases the licensees continue work beyond the original term of the licenses in anticipation of their renewal. Such continuance of work is both irregular and objectionable and should not be permitted. With a view, therefore, to allow sufficient time to the Director for obtaining and communicating sanction of such applications, Government are pleased to direct that applications for renewals of licenses should in future be submitted to the Director of Geology not less than two months before the date on which they terminate.

The necessary alteration in the rules will be notified in the Gazette.
